## Module descriptions 1st semester

Module-No./ Code	1
<b>Name of Module</b>	<b>Values, Ethics and Compliance</b>
Person responsible for module	Prof. Dr. Hans Rüdiger Kaufmann
Content of the module	<ul style="list-style-type: none"> <li>• Companies as goal-and value oriented institutions</li> <li>• Normative, strategic and operational management</li> <li>• Corporate ethics, corporate sustainability and corporate culture</li> <li>• Internal guidelines as defined by compliance, mission and vision statements, codes of conduct, and corporate culture</li> <li>• Overview of the national and international corporate law systems with an emphasis on board systems, shareholder and stakeholder rights</li> </ul>
Learning outcomes of the module	<ul style="list-style-type: none"> <li>• Legal foundations of management (corporate laws, human resource law, contract law, compliance related laws) are known and can be explained.</li> <li>• The principles of normative management can be named and demonstrated with examples.</li> <li>• The connection to strategic and operative action can be explained and illustrated with examples.</li> <li>• Students know the terms governance, compliance, and corporate culture and are able to explain them and evaluate their consistency.</li> </ul>
Semester	1st Semester
Duration of module	one semester
Frequency of module offer	every semester
ECTS-credits	6 ECTS-credits
Workload and its composition	Total workload: 150 hours Contact time: 60 hours Self-study: 90 hours
Type of module (required, elective, etc.)	required module
Application of module	M.A. Business Management M.A. Business Management & Digital Leadership
Prerequisites	none
Teaching language	English
Type of examination/ requirements for awarding of credit points	Written examination (90 minutes). Students will receive a case study (or a series of case scenarios) from a company and answer questions about the company's corporate structure and normative management.
Weighting of the module grade in the final grade	6/90 percent
Teaching and learning methods	Mix of short lectures, seminar-style discussions, and practical exercises based on selected texts, using examples from business practice as provided or from research, and online publications. During the second half of the module, students investigate the normative foundations (legal form, company mission and vision, governance, structures, corporate culture, etc) of their partner companies (or a virtual company) and share the findings in special small-group sessions and online

	conferences.

Module-No./ Code	2
<b>Name of Module</b>	<b>Critical Thinking in Management</b>
Person responsible for module	Prof. Dr. Frank Stäudner
Content of the module	<ul style="list-style-type: none"> <li>• Development of scientific Thinking</li> <li>• Theories, models, systems, hypotheses, explanations and predictions</li> <li>• Rules of good scientific practice for formulating and testing hypotheses</li> <li>• Critical rationalism and constructivism as a framework for acting in management</li> <li>• Benefits and limits of basic theories of management action: business and economic studies; economic and social psychology; psychology of learning; sociology</li> </ul> <p>Empirical and application-oriented management theories</p>
Learning outcomes of the module	<ul style="list-style-type: none"> <li>• Students can develop hypotheses and identify as well as classify the descriptive and normative elements of management theories</li> <li>• Students understand the system orientation of modern sciences and can explain it using examples from various economic and social sciences.</li> <li>• They can explain why leadership and management are complex fields of activity that require a theoretical basis.</li> <li>• Students can determine whether a claim – in particular from management literature – is formulated precisely, i.e. is verifiable. They know the rules of good scientific practice, in particular for writing scientific texts, and can apply theories correctly to analyse and solve practical management problems.</li> </ul> <p>They can outline a research design to answer basic management-related questions.</p>
Semester	1st semester
Duration of module	one semester
Frequency of module offer	every semester
ECTS-credits	6 ECTS-credits
Workload and its composition	Total workload: 150 hours Contact time: 60 hours Self-study: 90 hours
Type of module (required, elective, etc.)	required
Application of module	M.A. Business Management M.A. Business Management & Digital Leadership
Prerequisites	none
Teaching language	English
Type of examination/ requirements for awarding of credit points	Oral examination in teams of 3-4 students to be chosen by lot. Each team will receive a text of 2-4 pages from a management book. The students have two hours to analyse their text with the help of questions provided. The focus should be on the information content of the text (derivable hypotheses) and possible ways to test them empirically. Following the preparation time, each student has 15 minutes to

	<p>answer his or her questions. This is followed by fifteen minutes for questions by both examiners. Individual grades will be given.</p>
Weighting of the module grade in the final grade	6/90 percent
Teaching and learning methods	<p>Mix of short lectures, seminar-style discussions, and practical exercises based on selected texts, examples from research, and online publications. During the second half of the module, students should investigate the implicit or explicit theories that form the basis for management systems and and practice in their partner companies. They will share their findings in special small-group sessions and online conferences.</p>

Module-No./ Code	3
<b>Name of Module</b>	<b>System-Oriented Management</b>
Person responsible for module	Prof. Dr. Hans Rüdiger Kaufmann
Content of the module	<ul style="list-style-type: none"> <li>• The use of the term 'system' in the natural, economic and social sciences and as a concept in the area of technological applications</li> <li>• Systems Thinking's relevance for business administration, understanding complexity and problem framing</li> <li>• The concept of system science and the interdisciplinary approach: what are systems and how to think in terms of systems?</li> <li>• The foundations of cybernetics as a control science in technology and in management</li> <li>• System-oriented management studies</li> <li>• The General Management Model by F Malik</li> <li>• The Integrated Management System and the new St. Gallen management model</li> <li>• Viable systems model, Model of systemic control and the Team syntegration model</li> <li>• Leadership and change from an integrated/systemic perspective</li> <li>• Agile management and other trends in management incl. its systemic challenges for managers</li> </ul>
Learning outcomes of the module	<ul style="list-style-type: none"> <li>• Students know the definitional basis for the terms 'system' and 'system theory' and can explain them in a general sense and with examples, particularly the ability of systems to stabilise and complete themselves.</li> <li>• They can explain the 'systemic turn' in the natural, economic and social sciences and describe the logical problems associated with the reductionist approach.</li> <li>• They can give an overview of systemic theories in business and economic studies, sociology, and social psychology and go into more depth by citing examples.</li> <li>• Students can explain that cybernetics is the basic science for understanding control systems and thus the practice-oriented form of of management studies.</li> <li>• They can explain and talk about the relationship between the base models of system-oriented management (General Management Model, Integrated Management System, the balanced scorecard approach to management, EFQM- and ISO- Quality Management System).</li> <li>• They understand that finance controlling, HR controlling and quality management provide key indicators for the management control loop with the key figures they deliver.</li> <li>• Students can analyse and assess companies and their management systems presented in case studies using the systems learned.</li> <li>• They can explain their previous experience in companies (job or internship) using the named system models and discuss factors such as corporate culture and implicit/explicit rules of conduct and communication in the individual companies.</li> </ul>

Semester	1st semester
Duration of module	one semester
Frequency of module offer	every semester
ECTS-credits	6 ECTS-credits
Workload and its composition	Total workload: 150 hours Contact time: 60 hours Self-study: 90 hours
Type of module (required, elective, etc.)	required
Application of module	M.A. Business Management M.A. Business Management & Digital Leadership
Prerequisites	none
Teaching language	English
Type of examination/ requirements for awarding of credit points	Seminar paper. Students choose a company and describe, analyse and assess its management system in terms of one or more of the discussed cybernetic steering models. The length of the paper should be 5000 words.
Weighting of the module grade in the final grade	6/90 percent
Teaching and learning methods	Mix of short lectures, seminar-style discussions, and practical exercises on the basis of selected texts, examples from research and online publications. During the second half of the module, students explore the management systems used in their partner companies or in another chosen company and share their findings in special small-group sessions and online conferences.
Literature	<ul style="list-style-type: none"> <li>• Cunliffe, A. L. (2014): A very short, fairly interesting and reasonably cheap book about management. 2nd edition, London: Sage</li> <li>• Grand, S. Module-No./ Code	5
<b>Name of Module</b>	<b>Communicating and Negotiating in Management</b>
Person responsible for module	Prof. Dr. Perizat Daglioglu
Content of the module	<ul style="list-style-type: none"> <li>• Basic concepts of communication, especially management and corporate communication</li> <li>• Models of communication (von Thun, Watzlawick) and communication interference</li> <li>• Fundamentals of successful communication in professional contexts and the distinction between professional and private communication situations</li> <li>• The importance of leadership communication for the sustainability of corporate success</li> <li>• Classical and new communication channels (e-mails, online- conferences, social media, etc.) and their use</li> <li>• Ethical issues in corporate communications</li> <li>• Basics of negotiation techniques</li> <li>• Successful procedure according to the Harvard Negotiation Model</li> <li>• Typical business conflict situations and their content and rules</li> <li>• Negotiation techniques in conflict situations</li> <li>Basics of mediation in management</li> </ul>
Learning outcomes of the module	<ul style="list-style-type: none"> <li>• Students can name the basic theories of successful communication and communication interference and thus analyse and handle communication situations effectively.</li> <li>• They can explain the various communication media as well as the contents for which each is best suited.</li> <li>• Students can handle typical business communication situations confidently in English.</li> <li>• They know how to apply the principles of the Harvard Negotiation model in typical negotiation situations.</li> </ul>
Semester	1st semester
Duration of module	one semester
Frequency of module offer	every semester
ECTS-credits	6 ECTS-credits
Workload and its composition	Total workload: 150 hours Contact time: 60 hours Self-study: 90 hours
Type of module (required, elective, etc.)	required
Application of module	M.A. Business Management M.A. Business Management & Digital Leadership
Prerequisites	none
Teaching language	English
Type of examination/ requirements for awarding of credit points	Oral presentation Students must give a presentation to introduce a particular negotiation situation and prepare to carry out the negotiation, which will take place in both German and English or another language. The students will receive their negotiation topics four weeks before the examination date.

	Students will carry out their preparation in teams, with each student receiving his or her own specific task. The individual tasks are thematically related, e.g. through a common company or product base for each team.
Weighting of the module grade in the final grade	6/90
Teaching and learning methods	Mix of short lectures, seminar-style discussions, and practical exercises based on selected texts, examples from practice, and online publications. Students will participate in numerous role plays and other practical exercises.

**Module descriptions 2nd semester**

Module-No./ Code	6
<b>Name of Module</b>	<b>Processes and Process Management</b>
Person responsible for module	Prof. Dr. Özer Pinar
Content of the module	<ul style="list-style-type: none"> <li>• Definition of 'process' in the technical disciplines and in organisational theory</li> <li>• Definition of 'process management'</li> <li>• Elements of processes: goals, resources, input, value creation, output</li> <li>• Useful forms for describing processes (flow charts, technical roadmaps, verbal descriptions)</li> <li>• Typical measurement and evaluation methods for assessing the quality of processes</li> <li>• The company as a process landscape of interacting management, core and supporting processes</li> <li>• Process management as a management task</li> <li>• Typical risks and how they can be controlled through the management of processes</li> <li>• Quality and risk management norms and systems with an explicit process orientation</li> </ul>
Learning outcomes of the module	<ul style="list-style-type: none"> <li>• Students can clearly define 'process' and 'process management'.</li> <li>• They can describe the components of processes and their significance and discuss these using examples from companies.</li> <li>• They can develop process descriptions (flow charts) on the basis of verbal descriptions.</li> <li>• Students can describe the most important measurement and evaluation instruments including their key performance indicators (KPIs) and apply them to processes in given exercises.</li> <li>• They can outline the process landscape for companies where they work or have worked.</li> <li>• They can explain process management as a component of the management tasks 'organising' and 'managing' both in general terms and by means of examples.</li> <li>• Students can identify typical process risks accurately and explain how they can be controlled.</li> <li>• They can name quality and risk management standards and systems with an explicit process orientation and explain how they are structured.</li> </ul>
Semester	2nd semester
Duration of module	One semester - The first 8 weeks of the semester as these are followed by the internship
Frequency of module offer	every semester
ECTS-credits	6 ECTS-credits
Workload and its composition	Total workload: 150 hours Contact time: 60 hours Self-study: 90 hours

Type of module (required, elective, etc.)	required
Application of module	M.A. Business Management M.A. Business Management & Digital Leadership
Prerequisites	Completion of modules 1-5 as this module assumes that students have mastered the learning outcomes of the previous ones
Teaching language	English
Type of examination/ requirements for awarding of credit points	Written examination (90 minutes)
Weighting of the module grade in the final grade	6/90 percent
Teaching and learning methods	Mix of short lectures, seminar-style discussions, and practical exercises based on selected texts, examples from practice, and online publications. Students will participate in numerous role plays and other practical exercises.
Literature	<ul style="list-style-type: none"> <li>• Benedict, T., Kirchmer, M., Scarsig, M., Pater, F., Raju, S., Morris, D., Hilty, J. (2019). Module-No./ Code	7
<b>Name of Module</b>	<b>Intercultural Management</b>
Person responsible for module	Prof. Dr. Dolores Sanchez Bengoa
Content of the module	<ul style="list-style-type: none"> <li>• The concept of culture from the perspective of different social and behavioural sciences including anthropology and social psychology</li> <li>• Increasing interculturality due to the globalisation of suppliers and markets as well as migration and the increased mobility of labour.</li> <li>• Increasing interculturality through the new media and decentralised international teams spread across several locations.</li> <li>• Categories of culture and intra- and intercultural communication (living environment, value system, cohesion, identity)</li> <li>• Intercultural variations and constants in the goals, methods, and communication patterns of managers</li> <li>• Corporate culture in national companies and multinational corporations</li> <li>• Importance of intercultural teams</li> <li>• Intercultural marketing</li> <li>• Diversity management: using diversity as a resource</li> </ul>
Learning outcomes of the module	<ul style="list-style-type: none"> <li>• Students can explain the concept of culture from the perspective of different social and behavioural sciences and discuss interculturality in general and by means of examples.</li> <li>• They can explain how interculturality is becoming an increasingly important issue for companies and large international concerns due to the globalisation of suppliers as well as migration and the increased mobility of labour.</li> <li>• They know how to achieve acceptance and work successfully within international teams – including those that work across borders and at different locations – by adhering to the necessary rules of communication and using new media efficiently.</li> <li>• They can explain intercultural variations and constraints in the goals, methods and communication patterns of managers and take these into account with regard to their own behaviour.</li> <li>• They can outline the ethical and social philosophical foundations of diversity management and explain sources of diversity (gender-related, social, cultural, generational) and use it as a resource.</li> </ul>
Semester	2nd semester
Duration of module	one semester - The first 8 weeks of the semester as these are followed by the internship
Frequency of module offer	every semester
ECTS-credits	6 ECTS-credits
Workload and its composition	Total workload: 150 hours Contact time: 60 hours Self-study: 90 hours
Type of module (required, elective, etc.)	Required

Application of module	M.A. Business Management M.A. Business Management & Digital Leadership
Type of examination/ requirements for awarding of credit points	Students will receive a case study from an international company to prepare in teams of three or four. Preparation time is two weeks. Students should divide their answers to the key questions on the case study so that each person presents for 10 minutes and answers questions for 10 additional minutes. Individual grades will be given.
Weighting of the module grade in the final grade	6/90 percent
Teaching and learning methods	Mix of short lectures, seminar-style discussions, and practical exercises based on selected texts. In addition, students analyse typical processes and their interdependencies in their partner companies and create a process landscape of the most important processes.

Module-No./ Code	8
<b>Name of Module</b>	<b>Change Management and Organisation Development</b>
Responsible for module	Prof. Dr. Hans Rüdiger Kaufmann
Content of the Module	<ul style="list-style-type: none"> <li>• Framing corporate Dynamics: understanding the relevance of change and organisational development from a systems perspective</li> <li>• The importance of resilience in corporate norms, strategies and processes</li> <li>• Differentiation of and connection to personal development, business model, product and process innovation; the importance of lifecycles in business and society</li> <li>• Dealing with sudden changes and how to respond by application of minimum standards: models, tools and proven approaches</li> <li>• Resistance to change and the application of adapted communications styles</li> <li>• A smarter approach: Avoiding shocks and unintended consequences of responses to sudden changes by becoming an intelligent organization and complex adaptive system</li> <li>• Application of critical success factors in change initiatives: international change/transformation business cases and their stories</li> <li>• Corporate culture and ways to influence it</li> </ul>
Learnig outcomes of the module	<ul style="list-style-type: none"> <li>• Students will learn to perceive change as a common element of business dynamics</li> <li>• They'll be in a position to differentiate and explain the stages of organisational life cycles, the specifics behind and appropriate means to ensure the longevity of an organisation.</li> <li>• They can describe change theories and useful tools to run urgent adaptations to changing environments. They'll become familiar with typical defects in change processes.</li> <li>• Students will learn the concepts and ideas behind organizational culture. They will understand how appropriate leadership can influence the organisational culture in order to encourage an organization to become more adaptive in turbulent environments.</li> <li>• They can explain the nature of purposeful communication in changing environments and how to apply it effectively.</li> <li>• They will learn to understand the different types of innovation, the meaning of disruptions and the priority of managing an innovation pipeline.</li> <li>• Business cases and group work will underpin the logics of change.</li> </ul>
Semester	2nd semester
Duration of module	One semester - The first 8 weeks of the semester as these are followed by the internship
Frequeny of module offer	every semester
Number of ECTS-credits awarded	6 ECTS-credits
Total workload	Total workload: 150 hours Contact time: 60 hours Self-study: 90 hours
Type of module (required, elective, etc.)	required

Application of module	M.A. Business Management M.A. Business Management & Digital Leadership
Prerequisites	Modules 1 to 5 must be completed, as the content of these will be further developed.
Teaching language	English
Type of exam / prerequisites for awarding of credits	Written exam of 90 minutes. Regular attendance at lectures prerequisite for awarding of credits.
Weighting of the module grade in the final grade	6/90 percent
Teaching- and learning methods	Short lectures alternate with seminar discussion phases and practical exercises from selected texts and case studies, also from online publications. Participation in role plays and other practical exercises.

Module-No./ Code	9
<b>Name of Module</b>	<b>Management Internship</b>
Person responsible for module	Prof. Dr. Hans Rüdiger Kaufmann
Content of the module	<p>Students complete a management-related internship in the company of their choice: either a partner company or another company in Germany or abroad.</p> <p>During the internship they perform everyday tasks and also observe and describe selected elements of the management system and manager behaviour in their company.</p> <p>They describe, analyse and assess their experiences and observations in a 20-page internship report.</p> <p>The internship company and position must be approved by the head of studies.</p>
Learning outcomes of the module	<ul style="list-style-type: none"> <li>• Students can identify, describe and assess both consistencies and inconsistencies in a company's management system including the following aspects: strategy/goal, organisation (process, structures) and culture (customer orientation, values, attitudes, symbols)</li> <li>• They are able to formulate their thoughts in scientific terms and make connections to basic theories.</li> </ul>
Semester	2nd semester
Duration of module	one semester - 8 weeks, 3 of which extend beyond the normal semester teaching time
Frequency of module offer	every semester
ECTS-credits	12 ECTS-credits
Workload and its composition	<p>Total workload: 300 hours</p> <p>Contact time: 20 hours</p> <p>Self-study: 280 hours (8 weeks in companies)</p>
Type of module (required, elective, etc.)	required
Application of module	<p>M.A. Business Management</p> <p>M.A. Business Management &amp; Digital Leadership</p>
Prerequisites	Completion of modules 1-7 as this module assumes that students have mastered the learning outcomes of the previous ones
Teaching language	English
Type of examination/ requirements for awarding of credit points	<p>Students complete a 5000-word paper that focuses on an aspect of their company's management system. They should describe this aspect and assess it with regard to the theories learned in previous modules. They should also make suggestions about how this aspect of management could be optimised.</p> <p>This paper serves as a preparation for the master's thesis.</p>
Weighting of the module grade in the final grade	12/90 percent
Teaching and learning methods	<p>Before beginning the internship, students describe the planned activity and ask for agreement from the head of studies. During the course of the internship, students should identify topics that can be covered in the master's thesis with the inclusion of a relevant empirical element.</p>

Module-No./ Code	10
<b>Name of module</b>	<b>Research internship</b>
Responsible for module	Prof. Dr. Hans Rüdiger Kaufmann
Content of the module	<p>The module intensifies existing knowledge of statistics or empirical social research and directs the students (preferably small groups) to transfer theoretical academic questions to an empirical research design, to possibly connect this with other questions and work on it independently.</p> <p>Main focal points:</p> <ul style="list-style-type: none"> <li>• Basics of Research Philosophy</li> <li>• Qualitative and Quantitative Approaches</li> <li>• Identifying an economic or socio-scientific problem (research gap)</li> <li>• Co-ordination with other groups on possible thematic interfacing or overlapping</li> <li>• Searching for existing and useful data sources as well as describing them</li> <li>• Developing a first conceptual basis, examining and critically discussing relevant literary sources, consolidation of the theory and development of research hypotheses (quantitative) and research questions (qualitative)</li> <li>• Research methods and techniques</li> <li>• Probability and Non- Probability Sampling</li> <li>• Collecting empirical data; assessing its feasibility; research ethics</li> <li>• Exploratory, descriptive and explanatory data evaluation</li> <li>• Reconnecting empirical analysis to its fundamental theoretical basis</li> </ul>
Learning outcomes of the module	<ul style="list-style-type: none"> <li>• Learning outcome of the module Students acquire more profound knowledge of empirical social research and statistical methods.</li> <li>• They can master new specialist and methodological fields of knowledge.</li> <li>• They can collect data sources independently, apply them to the research problem/research objectives and, if necessary, adjust the topic to the data situation.</li> <li>• They can carry out social and economic analyses with secondary data (e.g. country analyses based on statistical annual reports or other statistical publications, social structure analyses with SOEP) and recognise which primary data collections might be helpful.</li> <li>• Students master the basics of multivariant methods.</li> <li>• They are able to formulate meaningful intermediate results in a presentable way.</li> <li>• They are able to write up and present final reports in the correct academic form (including the description of the methods used). Conference presentations and journal publications are encouraged.</li> <li>• They can also present (and visualise) the results in a shorter “business“ form.</li> </ul>

	<ul style="list-style-type: none"> <li>Students can competently assess the quality of academic studies of other researchers and justify this convincingly to others.</li> </ul> <p>They master statistical software (e.g. STATA, SPSS, R, HANA-Tools, MaxQDa).</p>
Semester	2 <sup>nd</sup> semester
Duration of module	one semester
Frequency of module offer	every semester
Number of ECTS-credits awarded	12 ECTS-credits
Total workload	Total workload: 300 hours, Contact time: 78 hours Self-study and exam times: 222 hours
Type of module (required, elective, etc)	elective
Application of module	M.A. Business Management M.A. Business Management & Digital Leadership
Prerequisites for participation	Business mathematics, statistics
Teaching language	English
Type of exam / prerequisites for awarding credit points	Research report of 5000 words Prerequisite for awarding credit points is regular participation in research internship.
Weighting of grade in the final grade	12/90 percent
Teaching and learning methods of the module	Lectures, short lectures by guest speakers, seminar presentations of intermediate results and practical exercises with relevant software
Literature	<ul style="list-style-type: none"> <li>Harned, B. (2017). Project Management for Humans: Helping People Get Things Done. Rosenfeld. Media. USA</li> <li>Kuckartz, U. (2014). Modul-Nr./ Code	11
Name of module	Practice Project
Responsible for module	Prof. Dr. Hans Rüdiger Kaufmann/Thomas Willmann
Content of the module	<p>Students work on a concrete problem from management practice in a limited time frame in co-operation with or on behalf of a company or another organisation.</p> <p>The practical project includes:</p> <ul style="list-style-type: none"> <li>• Clarification of the assignment &amp; concretisation</li> <li>• Gathering &amp; processing information (theory-based &amp; from the practical field)</li> <li>• Development of solution strategies &amp; approaches</li> <li>• Continuous adjustment of the developed concept to the needs of the client</li> <li>• Presentation to &amp; discussion of the results with the client</li> <li>• Documentation of results</li> </ul> <p>Clarification of the assignment, follow-up meeting if necessary and presentation of the results are accompanied by the lecturers of the HdWM. Otherwise, the teachers act as process facilitators and professional contact persons, encourage reflection on the current project status and personal learning processes.</p>
Learning outcome of the module	<ul style="list-style-type: none"> <li>• The students become familiar with complexity, uncertainty and dynamics in the modern working world and learn to work on a task in a creative and self-organised way. They can use current theoretical approaches and models to deal with a concrete management problem and acquire knowledge about structures, processes and the design of topics in the practical field.</li> <li>• Professional competence: The students link new knowledge with existing knowledge, they apply it within the framework of a complex practical problem and develop a practicable concept in a self-directed manner.</li> <li>• Methodological competence: The students learn to research systematically and purposefully as well as the purposeful processing of information and project design, control and organisation, finally the addressee-oriented preparation and presentation of results.</li> <li>• Social competence: The students can communicate in a solution-oriented manner in the project team and with the client, develop consensual solutions and recognise the necessity of effective cooperation to achieve the goal.</li> <li>• Personal competence: The students reflect on their own learning process and its results through feedback within the team, by the client and the accompanying lecturers. They acquire the competence for dealing productively with complexity, ambiguity and time pressure.</li> </ul>
Semester	2nd semester
Duration of Module	one semester

Frequency of Module Offer	every Semester
ECTS-Credits	12 ECTS-Credits
Workload and its composition	Total workload: 300 Stunden Contact time: 60 Stunden Self study and exam time: 240 Stunden
Type of module (required, elective, etc)	Elective
Usability of module	M.A. Business Management M.A. Business Management & Digital Leadership
Prerequisites for participation	Modules of the 1. Semester must be completed
Teaching language	English
Type of exam / prerequisites for awarding credit points	Final presentation and project documentation Prerequisite for the award of credit points is regular attendance at the appointments with the client.
Weighting of grade in the final grade	12/90 Percent
Teaching and learning methods of the module	Teacher-led assignment clarification, follow-up meetings and presentation of results

Module-No./ Code	17
Name of module	<b>Data Science, Business Intelligence, Analytics</b>
Responsible for module	Prof. Dr. Herbert Schuster
Content of module	<ul style="list-style-type: none"> <li>• The knowledge pyramid: From data via information to knowledge and decisions</li> <li>• Data Warehouse, Data Marts and Online Analytical Processing (OLAP).</li> <li>• Multidimensional data models, multidimensional thinking, business process perspective and different business perspectives</li> <li>• Suitable visualisation approaches for complex information connections: Dashboards, Business Cockpits and Balanced Scorecards, Infographics, Storytelling, Geographical Information Systems (GIS) and Micro-Geographical Market Segmentation procedures</li> <li>• Performance management and measurement: continuous optimisation and measurement of business performance</li> <li>• Data Mining tasks and procedures: procedures and algorithms for segmentation, discrepancy analysis, classification, prognosis, association analysis and sequence analysis</li> <li>• Text Mining variants and procedures: information extraction by means of computer linguistics, classification (ordering) of documents in a recognised classification system, clustering (grouping) of documents for retrieval of (homogenous) groups and document selection (information retrieval) for finding texts according to known search criteria</li> <li>• Predictive Analytics Methods Spectrum</li> <li>• The diverse application potential of Predictive Analytics</li> <li>• Predictive Analytics with SAP Predictive Analysis.</li> <li>• Predictive Analytics process cycle and project management: action and reaction models, descriptive report design and statistics for gaining in-depth data and business understanding, predictive modelling (model creation), scoring process, test process and model application</li> <li>• Example scenarios for Big Data in a modern information society</li> <li>• The four dimensions of Big Data: Volume, Variety, Velocity and Veracity.</li> <li>• Solution strategies for structured, semi-structured and unstructured data in Batch and Real-Time Processing</li> <li>• Standard SQL and In-Memory Databases, No SQL, Hadoop (HDFS), MapReduce and Streaming Complex Event Processing (CEP).</li> <li>• In-Memory computing and applications with SAP HANA Taxonomy and architecture components of Big Data solutions.</li> </ul>
Learning outcomes of the module	<ul style="list-style-type: none"> <li>• Students appreciate the idea of the knowledge pyramid: from data to information to knowledge to decisions.</li> <li>• Students feel comfortable dealing with classical (Data Warehouse) and new, highly innovative (Big Data) tools develop a business process perception and to differentiate between diverse business and sector perceptions and to adapt develop a business process perception and to differentiate</li> </ul>

	<p>between diverse business and sector perceptions and to adapt their own perception flexibly.</p> <ul style="list-style-type: none"> <li>• They understand the appropriate visualisation approach for presenting complex information correlations.</li> <li>• Students learn the process of Knowledge Discovery in Large Databases (KDD) and understand Data Mining and Machine Learning as a data -driven and hypothesis-free process.</li> <li>• They understand the functioning, application possibilities and limits of individual Data Mining processes for model creation and model validation.</li> <li>• They understand the principal structure of Data Mining algorithms: model and pattern structure, qualityfunction, optimising and search processes and data management strategies.</li> <li>• Through use of software and related computer exercises they gain an overview of Platform R as standard for Data Mining analysis.</li> <li>• They learn Text Mining variants and processes as well as types of knowledge discovery in Web Mining, Social Media Analytics and Sentiment Analysis.</li> <li>• They recognise the Predictive Analytics Method Spectrum and the diverse application potential of Predictive Analytics as well as the accompanying process and project cycle.</li> <li>• Through the software applied and related computer exercises they gain an overview of Predictive Analytics with SAP Predictive Analysis.</li> <li>• They recognise typical scenarios and the four dimensions of Big Data.</li> <li>• They develop solution strategies for structured, semi-structured and unstructured data in Batch- and Real-Time Processing.</li> <li>• They recognise the taxonomy and architectural components of Big Data solutions.</li> </ul> <p>Students are enabled to develop Data Science models (Big Data algorithms) independently in their companies, and to test and employ them.</p>
Semester	3rd semester
Duration of module	one semester
Frequency of module offer	Every semester
Number of ECTS-credits awarded	6 ECTS-credits
Total workload	Total workload: 150 hours Contact time: 60 hours Self-study: 90 hours
Type of module (required, elective, etc)	elective
Application of module	M.A. Business Management M.A. Business Management & Digital Leadership
Prerequisites for participation	none
Teaching language	English
Type of exam /prerequisites for awarding credit points	Written exam of 90 minutes. Prerequisite for awarding credit points is regular attendance at lectures
Weighting of grades in the final grade	6/90 percent

<p>Teaching and learning methods of the module</p>	<p>Short lectures alternate with seminar-type discussion phases and practical exercises with selected texts and research examples, also with online publications. In addition, in the second half of the module, in their cooperation company or other chosen company students research the analytical IT-systems in these companies and present them in the online conferences and group seminars.</p>
<p>Literature</p>	<ul style="list-style-type: none"> <li>• Berg, B. &amp; Silvia, P. (2013). SAP HANA - An Introduction. Walldorf: SAP Press.</li> <li>• Chapman, C. &amp; McDonnell Feit, E. (2015). Module-No./ Code	18
<b>Name of Module</b>	<b>Masterthesis</b>
Person responsible for module	Prof. Dr. Hans Rüdiger Kaufmann
Content of the module	<ul style="list-style-type: none"> <li>• Students work on the master thesis topic that was approved at the beginning of the semester. A generous amount of time is allotted so that students can conduct empirical research and evaluate their findings in and/or for companies.</li> <li>• The topic must be related to management and leadership including the basic theories taught in the Master's.</li> <li>• The thesis should have a practical application and be linked to empirical studies (in most cases).</li> <li>• Accompanying the work on the thesis, all students meet regularly with their first supervisors in the master colloquium to exchange views on methodological, thematic and formal issues.</li> </ul>
Learning outcomes of the module	<ul style="list-style-type: none"> <li>• Students can present complex management-related topics in written form using the rules of sound scientific and 2) maintaining a critical distance to management practice.</li> <li>• They are able to develop recommendations for optimising management systems and/or management practice.</li> </ul>
Semester	3rd semester
Duration of module	one semester
Frequency of module offer	every semester
ECTS-credits	18 ECTS-credits
Workload and its composition	Total workload: 450 hours Contact time: 40 hours Self-study: 410 hours
Type of module (required, elective, etc.)	required
Application of module	M.A. Business Management M.A. Business Management & Digital Leadership
Prerequisites	Students must have completed modules 1-11 as this module builds on the contents of previous courses. The master's examination can only take place after completion of modules 1-11.
Teaching language	English
Type of examination/ requirements for awarding of credit points	Master thesis of 15.000 words (16 ECTS-credits) and oral exam of 20 minutes (2 ECTS-credits).
Weighting of the module grade in the final grade	18/90 Percent
Teaching and learning methods	The 40 hours of contact time consist of: a) 8 half-day master's colloquia Regular exchange between teachers and students as well as moderated subject discussion among students in the Master's colloquium, individual consultations with first supervisors.
